# Fireclay Tile - Glazed Thin Brick by Fireclay Tile

## **Health Product** Declaration v2.1

created via: HPDC Online Builder

CLASSIFICATION: 04 20 10.00 Masonry(Thin Brick): Architectural & Glazed Masonry

PRODUCT DESCRIPTION: The raw brick that makes up our Glazed Thin Brick is sourced through a supplier who has been in business for over 100 years and continues to source and manufacture all brick right here in California, within 150 miles from the Fireclay Tile factory. Brick qualifies for LEED points and is glazed on site at the Fireclay Tile factory in Aromas, CA. As with all hand made tile and brick, some degree of color and size variation is to be expected.

# Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-standard

### FIRECLAY TILE - GLAZED THIN BRICK

PRODUCT THRESHOLD: 1000 ppm

RESIDUALS AND IMPURITIES CONSIDERED: Yes

RESIDUALS AND IMPURITIES NOTES: Brick made from Clay or Shale is extracted from the ground and fired to become a solid mass that does not off gas or leach out materials harmful to the environment or people.

OTHER PRODUCT NOTES: Clay/Shale Aluminum Silicate is the main ingredient in manufacturing clay brick products and is one of the most readily available soil types on earth. The product is recyclable by grinding, reforming, firing and repackaging. Crushed brick can be use as decorative landscaping materials. Fireclay tile recycles our own tile and glaze waste and reincorporates it into our recycled body tile.

**CLAY** ID: 1302-87-0 %: 95.0000 - 100.0000 NANO: ROLE: Clay, Aluminum Silicate, is the main ingredient in our thin GS: RC: **NoGS** None No brick.

HAZARDS: AGENCY(IES) WITH WARNINGS:

None Found No warnings found on HPD Priority lists

SUBSTANCE NOTES: Clay, Aluminum Silicate, is the main ingredient in our thin brick. It is one of the most abundant soil types on earth.

## FRITS, CHEMICALS (UNLEADED)

ID: 65997-18-4

%: <b>2.0000 - 5.0000</b>	GS: LT-P1	RC: None	nano: <b>No</b>	ROLE: Frits are oxides to color the glaze.		
HAZARDS:	AGENCY(IES) WITH WARNINGS:					
MULTIPLE	German FEA - Substances Hazardous to Waters			Class 2 - Hazard to Waters		

SUBSTANCE NOTES: Fritz are oxides to color the glaze. When fired at high temperatures in a kiln the resulting product is inert.

MANGANESE DIOXIDE ID: 1313-13-9

%: 0.0000 - 3.0000 GS: LT-ROLE: A pigment added to clay to make white brick transition to RC: NANO: **P1** None No browns and blacks.

AGENCY(IES) WITH WARNINGS:

SUBSTANCE NOTES: A pigment added to clay to make white brick transition to browns and blacks.

CHROMITE				ID: 1308-31-2	
%: 0.0000 - 3.0000	GS: NoGS	RC: <b>None</b>	NANO: <b>No</b>	ROLE: A pigment added to clay to make white brick transition to various ranges of grays.	
HAZARDS:	AGENCY(IES) WITH WARNINGS:				
None Found	one Found No warnings found on HPD Priority lists				

SUBSTANCE NOTES: A pigment added to clay to make white brick transition to various ranges of grays.

BARIUM CARBONATE									
%: 0.0000 - 3.0000	GS: LT- UNK	RC: None	NANO: <b>No</b>	ROLE: Barium Carbonate is used to tie up soluble salts inherent in clays that create efflorescence and scum.					
HAZARDS:	AGENCY(IE	AGENCY(IES) WITH WARNINGS:							
None Found	No warnings found on HPD Priority lists								

SUBSTANCE NOTES: Barium Carbonate is used to tie up soluble salts inherent in clays that create efflorescence and scum.

# **Section 3: Certifications and Compliance**

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

### **VOC EMISSIONS**

## **Emission Classification of Building Materials - M1**

CERTIFYING PARTY: Self-declared

ISSUE DATE: 2018-

05-01

EXPIRY DATE:

CERTIFIER OR LAB: Self Declared

APPLICABLE FACILITIES: Thin Brick does not give off volatile organic compounds, VOC's, because it is an inherently non-emitting source per

LEED®.

**CERTIFICATE URL:** 

CERTIFICATION AND COMPLIANCE NOTES:

## **Section 4: Accessories**

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

### **MORTAR AND GROUT**

HPD URL: No HPD Available

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:

Mortar and Grout are required for all Installations. VOC content of various mortars and grouts depends on the product selected.

# Section 5: General Notes

Fireclay Tile's Thin Brick does not contain any volatile organic compounds, VOC's. Fireclay Tile's Thin Brick is substantially lighter than traditional glazed brick, resulting in potentially an 85% cost and emission reduction. Fireclay Tile recycles our own tile and glaze waste and reincorporates it into our recycled clay tile.

### MANUFACTURER INFORMATION

MANUFACTURER: Fireclay Tile

ADDRESS: 901 Brannon Street

San Francisco CA 94013, United States

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
