

The majority of tile projects will require some form of trim. You can opt for bullnosed or glazed edged tile or perhaps trim pieces, but maybe you've chosen a specialty shape or perhaps tile trim just isn't your style. If either of these things is the case, Schluter® might be for you. Schluter® is a trim option usually made from metal, like aluminum, stainless steel, and brass but also available in PVC. Schluter® comes in many different profiles to provide a smooth and finished edge that hides the rough and cut edges of your tile installation. *Please note, Fireclay Tile does not currently sell Schluter® trim. Your installer should be able to assist with sourcing Schluter® trim samples or purchasing.*

## BENEFITS OF SCHLUTER®

- Gives your tile installation a finished appearance
- Protects tile edges and corners from chipping
- Provides easy transitions
- Offers more design possibilities
- Prevents tripping hazards
- Makes installations easier to clean
- Accommodates movement (e.g. expansion/control joints)
- Works with any Fireclay Tile product

## Schluter® Trim Use Cases

### EXPOSED WALL

Hide the raw edges of your tile and create elegant transitions between different materials.

### SHOWER NICHE

Use as an alternative to traditional tile trim (e.g. glazed edge or bullnose).

### SHOWER CURB

Protect tile edges from chipping in heavily trafficked areas such as curbs and stairs.

### FLOOR

Smooth the transition of floor materials with differing heights to minimize tripping hazards or add a decorative accent to your install.

## Schluter® Trim Use Cases (cont.)

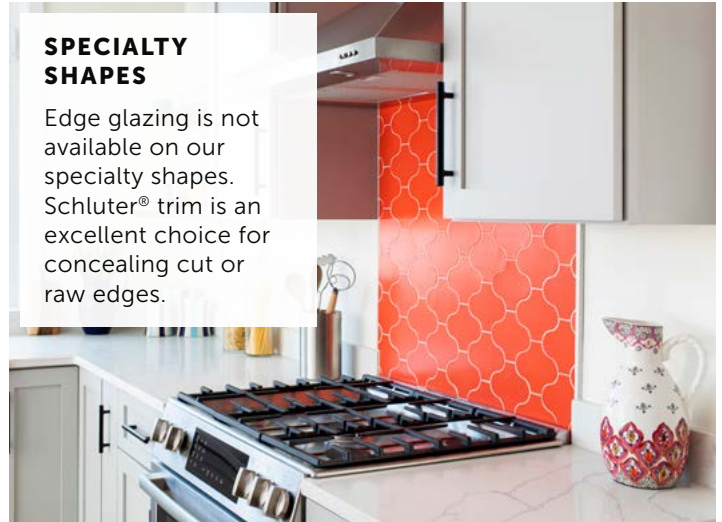

### WAINSCOT

A tiled, wainscot wall can gather dirt and dust over time. Installing Schluter® trim will make cleaning a breeze.

### SPECIALTY SHAPES

Edge glazing is not available on our specialty shapes. Schluter® trim is an excellent choice for concealing cut or raw edges.

**Schluter® is compatible with all Fireclay Tile products:**

### CERAMIC TILE + SCHLUTER®

Profile Height: 8 mm (5/16")

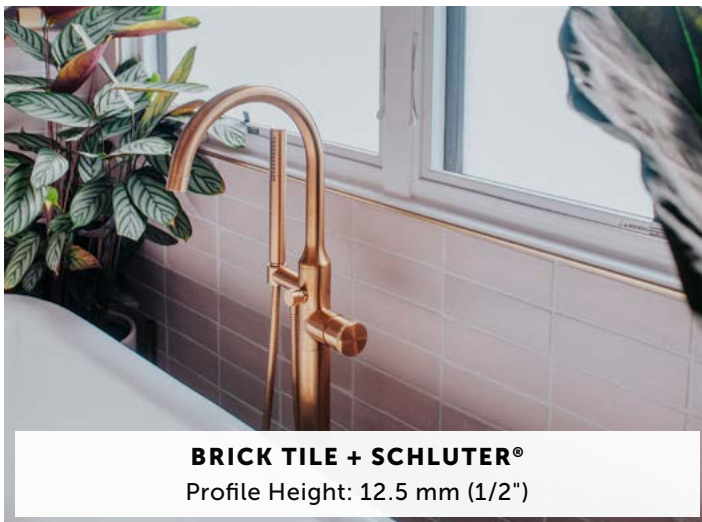

### GLASS TILE + SCHLUTER®

Profile Height: 6 mm (1/4")

### BRICK TILE + SCHLUTER®

Profile Height: 12.5 mm (1/2")

### HANDPAINTED TILE + SCHLUTER®

Profile Height: 8 mm (5/16")
